

Supply Chain Disclosure Palm Oil

Snapshot: December 2022

Published: May 2023

Total volumes sourced in 2022: 445,000 tons

Notes:

As with any traceability efforts, this is a snapshot that reflects our supply chain mapping efforts over the last years, last updated in December 2022, which is a mix of self-declaration and paper-based verification and should not be taken as fully exhaustive nor fully accurate as supply chain flows evolve on a daily basis. To the best of our knowledge, the information contained in this list is accurate and reliable as of the date of publication; however, we do not assume any liability whatsoever for the accuracy and completeness of this information. Therefore, no rights can be derived from this list.

Based on the traceability information self-declared by our suppliers and paper-based verification in 2022, Nestlé achieved 99% traceability to mill for 99% of the volumes we sourced.

The mills association with Tier 1 suppliers does not indicate ownership of the mills by that Tier 1 supplier. The mill owner is indicated by the "Mill Company Name". The Tier 1 supplier relationship to the mill is through direct or indirect sourcing, except in the cases where the Mill Company Name is the same as the Supplier name.

The mills associated with two companies indicated with an asterisk (*) were declared by our suppliers in 2022. These two companies, however, have been suspended from Nestlé's supply chain due to grievances brought to our attention alleging non-compliance against the Nestlé Responsible Sourcing Standard (RSS). We are working with our suppliers to ensure that these mills (at a group level) are not to be a part of our supply unless appropriate remediation plans have been agreed and are being implemented.

We aim to share accurate and credible traceability data. Any stakeholder who may have any reliable data that is inconsistent with our own is invited to share it with us, so we can analyze it and make any necessary correction to our supply chain disclosure.
